PROFESSIONAL SUMMARY

Full Stack AI Application Engineer with **4+ years of hands-on experience** building scalable web, mobile, and AI-powered applications across insurance, SaaS, and intelligent automation domains. Specialized in **React.js**, **Next.js**, **Node.js**, **FastAPI**, and modern LLM application development including **RAG pipelines**, **on-device inference**, **token streaming**, and **prompt orchestration**. Proven ability to design and ship end-to-end systems—from architecture and APIs to deployment—with strong focus on performance, scalability, and business impact.

CORE SKILLS

Frontend:	React.js, Next.js, JavaScript, TypeScript, Shadcn UI, React Query, Redux, React Hook Forms
Backend:	Node.js, Express.js, Django, Django REST Framework (DRF), REST APIs
AI / LLM:	RAG Pipelines, Ollama, Prompt Engineering, Token Streaming, Local LLM Inference
Databases:	PostgreSQL, Prisma ORM, SQLAlchemy, Django ORM, Vector Databases
Tools & DevOps:	Git, GitHub, Docker, AWS Lambda, AWS App Runner, Cron Jobs
Mobile:	React Native, Expo, NativeWind
Concepts:	Authentication & Authorization, API Integration, Webhooks, SSR/SSG, SEO Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer Ecomoney Insurance Broker	Oct 2025 - May 2026 <i>Gurugram, Haryana</i>
---	--

[Live link](#)

- Integrated and tested **Bajaj Allianz** property insurance APIs within the UAT environment, ensuring accurate policy processing before production deployment.
- Implemented **Care Health Insurance** APIs to automate customer policy renewal workflows and improve operational efficiency.
- Integrated **Razorpay payment gateway** with webhook verification to enable secure real-time transaction processing.
- Designed and implemented an automated reminder system using **cron jobs** and database polling, eliminating the need for external queue systems.
- Engineered a **WhatsApp Messaging API** integration to automate customer alerts and communication workflows.

Full Stack Developer PCI Infotech (Singapore)	March 2024 - Sep 2025 <i>Remote</i>
--	---

- Developed and maintained scalable web applications using **Next.js**, **React.js**, and TypeScript.
- Improved frontend performance by **30%** through code optimization, reusable components, and efficient rendering strategies.
- Collaborated with designers and backend teams to deliver responsive and user-centric interfaces.
- Implemented SEO optimization techniques in Next.js applications using dynamic routing and server-side rendering.

Frontend Developer BlackCap IT	July 2023 - February 2024 <i>Jammu</i>
---	--

- Built responsive and cross-browser compatible user interfaces using modern frontend technologies.

- Enhanced UI/UX by implementing reusable React components and responsive layouts.

Django Intern Auctopus Technology

April 2023 - May 2023
Remote

- Assisted in backend development using Django and Django REST Framework.
- Worked on API development, database management, and backend debugging tasks.
- Collaborated with the development team on feature implementation and testing.

EDUCATION

Bachelor of Science (B.Sc) Cluster University of Jammu

2017 - 2020

Self-directed upskilling (2021–2022): Intensive hands-on learning in full stack development, AI tooling, and backend architecture through advanced udemy coursework and personal projects.

PROJECTS

Open Source RAG Platform

- Building an end-to-end **Retrieval-Augmented Generation (RAG)** platform using **FastAPI**, **Next.js**, and **Ollama**.
- Architected the system as a **monorepo** with shared frontend and backend modules for maintainability and scalable development.
- Implemented document ingestion pipelines including parsing, chunking, embedding generation, and semantic retrieval.
- Designed local inference workflows using Ollama to support privacy-focused AI applications without external API dependency.
- Exploring vector similarity search, reranking, and prompt orchestration to improve retrieval accuracy and reduce hallucinations.

Multi-Tenant SaaS Application

[Live link](#)

- Built a white-labeled multi-tenant SaaS platform for agencies and client management.
- Developed a drag-and-drop website and funnel builder with responsive layouts and undo/redo functionality.
- Implemented Kanban-based project management features with role-based access control.
- Designed scalable multi-agency and sub-account architecture for client onboarding workflows.
- **Technologies:** Next.js 14, Prisma ORM, Clerk Authentication, PostgreSQL

Local AI Chat Mobile Application

- Built a cross-platform mobile AI chat application supporting fully offline **on-device LLM inference**.
- Integrated **MLC LLM** and implemented real-time token streaming using **Vercel AI SDK**.
- Optimized prompt injection, memory bounds, and sampling parameters for low-compute mobile devices.
- Improved inference stability by tuning temperature, top-P, and repetition penalties.

AI Writing Assistant Chrome Extension

- Built a Manifest V3 Chrome extension for AI-powered text rewriting and prompt optimization.
- Developed high-performance draggable UI using React and native pointer events.
- Built asynchronous message pipelines to ensure deterministic AI output formatting.
- Technologies: React, TypeScript, Tailwind, Gemini API
