PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience building scalable, production-grade web applications. Proven track record of integrating third-party APIs (insurance, payment gateways, messaging), improving frontend performance, and delivering end-to-end features across React.js, Next.js, Node.js, and Django. Comfortable working across the stack — from database design to cloud deployment — with a strong focus on clean architecture and measurable business outcomes.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Shadcn UI, Redux, React Query, React Hook Form

Backend: Node.js, Express.js, Django, Django REST Framework, REST APIs, Webhooks

Databases: PostgreSQL, Prisma ORM, SQLAlchemy, Django ORM

DevOps & Tools: Git, GitHub, Docker, AWS Lambda, AWS App Runner, Cron Jobs

Mobile: React Native, Expo, NativeWind

Concepts: Authentication & Authorization, SSR/SSG, SEO Optimization, Multi-Tenancy

PROFESSIONAL EXPERIENCE

Full Stack Developer | [Ecomoney Insurance Broker](#) • Gurugram, Haryana Oct 2025 – May 2026

- Integrated Bajaj Allianz and Care Health Insurance APIs in UAT and production environments, enabling automated policy issuance and renewal workflows for thousands of customers.
- Built a Razorpay payment gateway integration with webhook verification, ensuring secure and real-time transaction processing across all insurance products.
- Designed an automated reminder system using cron jobs and database polling, reducing manual follow-up effort and improving customer policy renewal rates.
- Engineered WhatsApp Messaging API integration to automate customer communications, cutting notification delivery time and improving engagement.
- Collaborated with cross-functional teams to improve API reliability and backend workflow performance ahead of production launches.

Full Stack Developer | [PCI Infotech \(Singapore\)](#) • Remote Mar 2024 – Sep 2025

- Developed and maintained scalable web applications using Next.js, React.js, and TypeScript, serving clients across Southeast Asia.
- Reduced frontend load time by ~30% through code splitting, reusable component architecture, and optimized server-side rendering strategies.
- Implemented SEO best practices using Next.js dynamic routing and SSR, improving organic discoverability for multiple client projects.
- Collaborated closely with designers and backend engineers to deliver pixel-accurate, responsive, and accessible user interfaces.

Frontend Developer | [BlackCap IT](#) • Jammu Jul 2023 – Feb 2024

- Built responsive, cross-browser-compatible UIs using React.js, delivering polished interfaces for 3+ client projects.
- Introduced a reusable component library that reduced UI development time by an estimated 25% across subsequent projects.
- Participated in code reviews and enforced modular architecture patterns, improving long-term maintainability of the codebase.

Django Backend Intern | [Auctopus Technology](#) • Remote Apr 2023 – May 2023

- Assisted in building REST APIs using Django and Django REST Framework, contributing to data management and backend debugging tasks.
- Collaborated with the dev team on feature implementation and testing, gaining hands-on experience with production-level backend workflows.

KEY PROJECTS

AI Writing Assistant (Open Source) Frontend / Extension Engineer | [Date] * Core AI Integration: Developed a Manifest V3 Chrome extension using the Gemini API for direct text rewriting and advanced prompt optimization — *Reactjs, vite, gemini api*

- **Custom Draggable UI:** Engineered a high-performance, zero-dependency draggable floating panel using **React**, **Tailwind CSS**, and native **Pointer Events** (`setPointerCapture`).
- **Deterministic Outputs:** Structured asynchronous message-passing channels and strict system instructions to guarantee raw, paste-ready text outputs by eliminating markdown wrapper artifacts.
- **Tech Stack:** React, TypeScript, Tailwind CSS, Chrome Extension API (MV3), Gemini API

Local AI Chat Mobile Application | React Native, TypeScript, Vercel AI SDK, MLC LLM

- Engineered a high-performance cross-platform mobile chat application featuring fully offline, on-device AI inference utilizing React Native and the MLC engine.
- Implemented real-time token streaming using the Vercel AI SDK, optimizing system prompt injection and memory bounds to eliminate generation latency.
- Optimized resource usage on low-compute mobile hardware by configuring precise sampling parameters (temperature, top-P, and repetition penalties) to prevent looping and maximize response accuracy.

Multi-Tenant SaaS Platform — *Next.js 14, Prisma ORM, Clerk, PostgreSQL*

- Built a white-labeled SaaS platform enabling agencies to onboard and manage sub-accounts with full role-based access control.
- Developed a drag-and-drop website and funnel builder with undo/redo functionality and responsive layouts, supporting multiple agency clients from a single codebase.
- Designed a scalable multi-agency architecture with isolated data tenancy and custom onboarding workflows.

REME — AI-Powered Insurance Claim Management — *Next.js, CopilotKit, QuickBooks API*

- Built an AI chatbot using CopilotKit to streamline WhatsApp-based insurance claim workflows, reducing manual intervention.
- Integrated QuickBooks API to sync expenses, journal entries, and ledger data in real time, and added currency conversion APIs for dynamic financial reporting.

JKCarmart — Pre-Owned Car Marketplace — *Next.js, React.js*

- Developed a responsive digital marketplace for pre-owned cars with advanced search, filtering, and user dashboard features.
- Built reusable component architecture to support rapid feature additions and consistent UX across devices.

EDUCATION

Bachelor of Science (B.Sc.) — Cluster University of Jammu 2017 – 2020

Self-directed upskilling (2021–2022): Completed extensive online coursework and personal projects in full stack web development, building foundational expertise in React, Django, Node.js, and REST APIs prior to entering the industry.
